

Doon University, Dehradun

NOTICE

Date: 8 June, 2022

There's a temporary vacancy for a Project Associate to study plant-animal interactions in high-altitude ecosystems. The position will be based at Doon University, Dehradun. The successful candidate will have the following qualifications:

- (i) an M.Sc. degree related to Ecology/Entomology/Wildlife Biology/Agriculture
- (ii) experience in conducting field research in the above fields, preferably in high-altitude regions
- (iii) demonstrated ability to collect, store and identify insects
- (iv) prior experience and an interest in studying plant-insect interactions

Salary: 25000 p.m. + HRA (as per DST norms)

Duration: Initial hiring until September 2022 with potential extension for 1 year.

Deadline for application: June 17th, 2022

The job will involve fieldwork in high-altitude grasslands of Himalaya and trans-Himalaya for collecting data on plants and insects. In addition, the candidate is expected to help the PI in reviewing and collating literature, and writing manuscripts as the need arises. Interested candidates may please send a 1-page CV along with a short cover letter (max. 1 page) (explaining how their prior experiences and their research interests overlap with this position) by email to mayankk@doonuniversity.ac.in. Shortlisted candidates will be invited for an online interview.
